

# ACKNOWLEDGEMENT

Any achievement does not depend solely on the individual efforts but on the guidance, encouragement and co-operation of intellectuals, elders and friends. A number of personalities, in their own capacities have helped us in carrying out this mini project work. We would like to take this opportunity to thank them all.

We would like to express my profound thanks to **Sri. G Dayanand**, Chairman, Sapthagiri College of Engineering Bangalore, for his continuous support in providing amenities to carry out this Mini Project.

Special Thanks to **Dr. N. Srinivasan**, Director, Sapthagiri College of Engineering Bangalore, for his valuable suggestion.

Also we would like to express our immense gratitude to **Dr. H Ramakrishna**, Principal, Sapthagiri College of Engineering Bangalore, for his help and inspiration during the tenure of the course.

We also extend our sincere thanks to **Dr. Kamalakshi Naganna**, Professor and Head, Department of Computer Science and Engineering, Sapthagiri College of Engineering, for her constant support.

We would like to express our heartfelt gratitude to **Mr. Srikantha Gowda R**, Assistant professor and **Mrs. Kavya N L**, Assistant professor, Department of Computer Science and Engineering, Sapthagiri College of Engineering, for their timely advice on the mini project and regular assistance throughout the work.

We also extend our sincere thanks to all the **Faculty members** and **supporting staff** Department of Computer Science and Engineering, Sapthagiri College of Engineering, for their constant support and encouragement.

Finally, we thank our parents and friends for their moral support.

**B PRASHANTH**

**HARSHA H**

## **ABSTRACT**

Airline reservation system is a computerized system used to store and retrieve information and conduct transactions related to air travel. The mini project is aimed at exploring the relevance and importance of Airline Reservation System. It is projected towards enhancing the relationship between customers and airline agencies through the use of ARS, and thereby making it convenient for the customers to book the flights as when they require such that they can utilize this software to make reservations. The details of flights, customer information, flight price and timings, refund information, etc. are stored in a database from where it can be easily accessed and manipulated.

## TABLE OF CONTENTS

Sl. No.	CHAPTERS	PAGE No.
<b>1.</b>	<b>Introduction</b>	<b>1</b>
1.1	Introduction to DBMS with architecture diagram	1
1.2	Overview of the project	3
1.2.1	Problem statement: Define project in single statement	3
1.2.2	Objectives of the project: Mention aim in points	3
<b>2.</b>	<b>System Design and Methodology</b>	<b>4</b>
2.1	System architecture	4
2.2	ER diagram	5
2.3	Schema diagram	7
<b>3.</b>	<b>System Specification</b>	<b>8</b>
3.1	System Requirements	8
3.1.1	Hardware Configuration	8
3.1.2	Software Configuration	8
<b>4.</b>	<b>System Implementation</b>	<b>9</b>
4.1	Module Description	9
<b>5.</b>	<b>Results and Screenshots</b>	<b>11</b>
<b>6.</b>	<b>Conclusion and Future Works</b>	<b>17</b>
<b>7.</b>	<b>Bibliography</b>	<b>18</b>

## LIST OF FIGURES
